

UTP-902POE

The new PoE adapter for powering any RouterBOARD over Ethernet. Simply connect your power source and then use an ethernet cable to connect the injector to the device.

Helps reducing number of wires that lead up the tower. Power over pins 4 and 5 is used to power and communicate with 10/100 Mbps devices.

For using with any RouterBOARD that supports 9-48V PoE.

PoE	Passive POE (non 802.3af)
Input	9 - 48V
Power	4,5 Cable Pins - 9-48V; 7,8 Pins - Return
Max. Current	2A
Ethernet Cable Length	50-150 meters
Ethernet Speed	10/100 Mbps
